SUMMARY

Senior Product Designer with 10+ years of experience and a hybrid design-and-code profile. At HelloFresh, I lead the design org's shift to AI-assisted, designer-owned implementation: I built and maintain an AI workflow automation for design that covers user research, hypothesis creation, validation, prototyping, testing with emulated personas, and implementation in production code, including a suite of Claude Code agents for UX, a UX Quality workflow aligned with the Zest design system, and biweekly UX AI Office Hours. Scaled this workflow to 26+ designers across 9 brands and was the first designer at HelloFresh to merge code into production (React and React Native). As part of HelloFresh's design system team, I support design tokens, restructuring, component updates, and accessibility improvements. Previously, I was the sole designer for The Pets Table, HelloFresh's pet food brand, for three years, owning the end-to-end user flow from launch through scale, from UI to product strategy and research. Partnered closely with Data on A/B testing and experimentation to improve, among other metrics, Conversion Rate and Average Order Value. Experienced in UX research (interviews, usability testing, Sprig, UserTesting), design systems, and cross-functional work in Agile teams.

SKILLS

AI & Design Engineering: Claude Code, AI workflow automation for design, AI-driven testing with emulated personas, design-to-code, prototyping in code, Git

Product Design: UX/UI design, user flows, wireframing, prototyping, design systems (Zest, Atomic Design), Figma

Research & Experimentation: A/B testing, hypothesis creation and validation, user interviews, usability testing, journey mapping, OOUX, Sprig, UserTesting, Dovetail

Graphic: Photoshop, InDesign, Illustrator, Premiere, After Effects

Ways of Working: Agile/Scrum, Jira, workshop cross-functional collaboration

PROFESSIONAL EXPERIENCE

HelloFresh, Consumer Acceleration, Berlin

Senior Product Designer

Jan. 2026 – Present

- First designer at HelloFresh to merge code into production.
- Built and maintain an AI workflow automation for design covering research, hypothesis creation, validation, prototyping, testing with emulated personas and implementation in production code.
- Built a suite of Claude Code agents for UX covering prototyping, AI-driven testing and design-to-code for React and React Native.
- Defined the UX Quality workflow to keep AI-generated work aligned with Zest (the Design System), and established biweekly UX AI Office Hours for designers, researchers, engineers and PMs.
- Scaled the workflow to 26+ designers across 9 brands, replacing static handoffs with designer-owned implementation.

Key Technologies and Tools: Claude Code, React, React Native, Git, Figma, Zest Design System

HelloFresh, The Pets Table, Berlin

Senior Product Designer

Sep. 2021 – Dec. 2025

- Sole designer for HelloFresh's new pet food brand for 3 years; launched and scaled the product, owning the end-to-end user flow and creating features for both growth and retention.
- Used the White Label design solution to scale fast and steady; role ranged from UI to strategy definition and research initiatives.
- Worked closely with Data on A/B testing and experimentation to improve metrics like Conversion Rate and Average Order Value.
- Previously improved the meal choice experience for other HelloFresh brands across the globe, including Factor, EveryPlate and Chefs Plate.

Key Technologies and Tools: Figma, Sprig, UserTesting, Dovetail, A/B testing, Jira, Confluence

MVP Factory, Berlin

Product Designer

Dec. 2020 – Aug. 2021

- Established foundational designs for MVP app and website solutions.
- Conducted workshops with clients and structured and presented user research insights.

finleap → Joonko, Berlin

Product Designer

Oct. 2019 – Oct. 2020

- Developed wireframes, prototypes and flows for the Consumer Loans vertical within a cross-functional team, using Atomic Design and shared design libraries to create the UI and conduct user testing for feedback incorporation.
- Facilitated multidisciplinary strategic problem-solving workshops.

ília digital, Brasília, Brazil

Product Designer

Aug. 2017 – Apr. 2019

- Crafted user flows, wireframes, prototypes and UI for sectors like finance and entertainment industry.
- Collaborated with stakeholders on product strategies.
- Conducted UX research using interviews, journey maps and usability tests in Agile Scrum teams.

GAU, Brasília, Brazil

Associate Creative Director

Oct. 2015 – Apr. 2017

- Co-founded an advertising agency, serving as Creative/Art Director; managed client branding, produced graphic materials, attended meetings and handled business bureaucracy, including service proposals and pricing.
- Participated in video productions and wrote scripts for advertisements.

Clicklab, Brasília, Brazil

Art Director

Jul. 2013 – Dec. 2014

- Created advertising materials for social media.
